# OVER-INFLATED!

PAINFULLY PUFFY

### LINDSAY'S FULLY LOADED

Lindsay Lohan says, "It's sad and disgusting that anybody would have work done at my age." But Dr. Salzhauer thinks the 23-year-old got "way too much filler." He estimates that she has 2 cc — almost a half teaspoon — in her upper lip alone!

### SHE WANTS TO BE PRETTIER

"I felt insecure next to Audrina and Heidi," explains *The Hills'* Stephanie Pratt. Spartanburg, S.C., plastic surgeon Dr. Michael Orseck believes she may have used a filler and says, "Women who go overboard with injectables have unrealistic expectations."

Have these celebrities been plumping up with fillers to stay young and beautiful? Their makeovers have left them looking like they're ready to pop

SUPER-PLUMPED CHEEKS

### SHE CAN'T HIDE IT

While Madonna has said, "I'm not going to have a press conference if I have plastic surgery," Dr. Salzhauer thinks the *Material Girl*, 51, has packed 4 cc of filler into each cheek.

### SHE KNOWS IT'S BAD

Lisa Rinna told *In Touch* she "went too far" with Juvéderm injections in her cheeks. "I don't want to look weird," admits the star, who also has permanent silicone implants in her lips.

### KIM HAS A NEW FACE

Li! Kim loves being the center of attention, but now it's her face that has everyone shocked — she looks like a different person! "It looks like she injected apples into her cheeks!" notes Dr. Ginsberg.
